seedlings & liners

Unusual Deciduous Species

December '15 - January '16

Dear Friends,

With many “new opportunity” plants in this list, we focus on a single fresh one among more than 360 unusual seedlings and cultivars. With many sizes to match your needs, our consistency of supply makes us a premier supplier of liners in the US trade. **Count on us to be the foremost of your liner suppliers.**

Asimina triloba – Pawpaw - On a visit to Kalamazoo this fall, we were out for a walk and noted a large patch along a creek. It was fruit ripening time, so we looked, but didn't find many. Then we shook the small trees and succulent little treasures fell all around us. What a distinctive taste - pleasant and unlike any other fruit, temperate or tropical.

- Given the popularity of small fruit trees, this is an item that lends itself well to a backyard garden. Because they're easy to tend, Pawpaws are well-suited to the urban landscape. No mildew sprays or insecticides required - an organic option. Note also: it's native in 25 states in the East, adapted across almost the entire eastern half of the country - a small tree to appeal to tens of millions of people if they provide it a well-drained, fertile soil with some water during dry periods. Offer it in a container for sale season-long.
- We have 5 of the best grafted new varieties in addition to seedlings. All are container grown to assure your transplant success. Seldom available in quantity, these are a choice item, a unique profit opportunity that we will offer annually. Depend on us to be your regular pawpaw supplier. To promote it, have a nursery or GC pawpaw tasting event – ask us how to stage it!

As we look forward to a new year and production season, we note that **your liner choices today position you for profit years from now**. So choose carefully. Don't accept mediocrity merely to save a nickel or two if you aren't getting exactly what you need from your present supplier. Accurate counts, courtesy and “quality” are no longer selling points: these are the basics in your supplier relationships.

From Heritage, look for the best in new stuff, ideas to shorten your production time, and liners grown without lots of pesticides. If you graft, remember that we offer an amazing selection of basic and unusual rootstocks- including Japanese maple seedlings to *Carpinus*, *Cercis*, *Cornus*, *Fagus*, *Ginkgo*, *Magnolia*, *Nyssa*, *Quercus*, *Styrax*, & *Zelkova*. Try ours; otherwise, you don't know what you're missing.

Happy New Year!
